

Grady Booch's Vision of Software Engineering in the Age of AI

Watch the following YouTube videos and provide a reflection on how Grady Booch's insights resonate with your understanding of software engineering.

- From Formal Methods to Vibe Programming - Grady Booch - ESEM 2025 Keynote
 - <https://www.youtube.com/watch?v=oxhwpcgvNi0>
- The third golden age of software engineering – thanks to AI, with Grady Booch
 - <https://www.youtube.com/watch?v=OfMAtaocvJw>

In your reflection, consider how AI might change the practices and methodologies with which you are familiar in software development. Discuss your vision for the future of software engineering with the integration of AI. Additionally, reflect on any skills or adaptations you believe will be necessary for software engineers moving forward.

Please note that this should not be a summary essay; focus instead on your personal insights and interpretations.

Your reflection should be at least half a page long but not exceed one page (single spacing). Do not submit two reflections, one for each video. Instead, the single reflection should be based on both videos.

Note: Do not use AI tools to summarize the video. You can use them for spelling and grammar, but avoid using them for content generation.
